

# ARC

Based on the requirements of Consultants of Oman, ACP continuously evolves its range to take it to another level by adding creative designs. ARC is a similar addition to our range of existing beautiful designs.

The ARC shaped interlocking tiles, once laid symmetrically provide breathtaking fan pattern designs. These provide an emphatic visual impact to any pavement, open areas, patios, indoor or outdoor landscapes, etc. ARC pattern has already set a benchmark in quality, performance, versatility and it speaks volumes about ACP's great insight to come up with such appealing designs and present it to its valuable customers and clients.

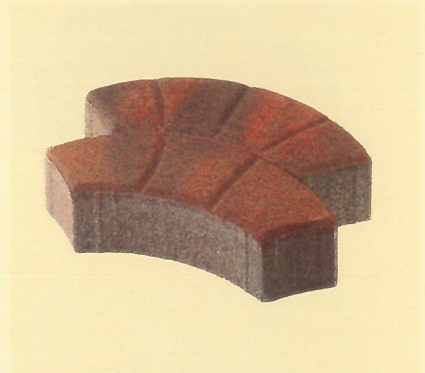

The resultant fan pattern from ARC design comes in wide colour choices and it can be laid in vast range of patterns and formations to echo a landscaping theme or requirement.

**ARC provides great flexibility by using mix of colours which in turn result in various design possibilities for the Consultants and Architects. The application areas are many, some of which are as follows :-**

- Roads – Side and central pavements and walkways.
- Parks, Amusement Centres, Public Sit-outs, etc.
- Villas and roof sit-outs
- Souqs, Hypermarkets, Theatres, Hotels & Restaurant outdoors, etc.
- Port areas, Beach areas, Corniches
- Airports
- Cargo complexes
- Storage depots and industrial areas
- Warehouses
- Bridge deck sides
- Container depots
- Parking areas
- Mosques, Exhibition grounds
- Workshops
- Abattoirs
- Filling stations, etc.
- Other external hard landscaping areas

Only quality inorganic colour pigments and natural aggregates are used. Minor variation in colour and texture may occur. This is normal and does not constitute reason for complaint.
